

Large Sets

VENTED GAS LOGS

Kodiak series vented logs feature two styles of massive logs for large fireplace applications, designed in combination with our Double-Stack™ and Triple-Stack™ burner systems, and were 2008 Vesta Award Finalists.

Kodiak Double Stack

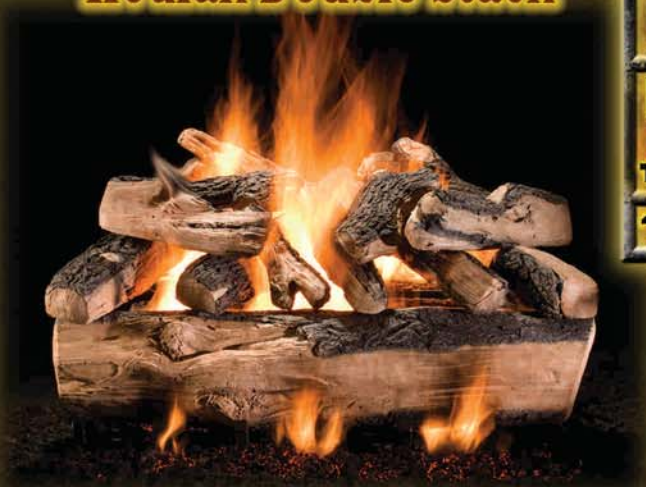

Kodiak Char weaves huge charred logs and colorful split pieces into a beautiful fire that will fill the largest fireplace.

The Double-Stack™ burner system uses a large ember bed burner for plenty of glowing embers and an elevated main burner for additional flame in the upper areas of the log set, and is designed to work with both Kodiak log sets or as a foundation for custom designed log sets.

Double-Stack™ Burner

Kodiak Split offers exceptionally large and detailed split logs with deep textured bark for an outstanding fresh cut look.

Kodiak Double-Stack Series

- Massive Split or Charred Styles
- Double Stack Dual Burner System
- Natural gas only

Kodiak Triple Stack

Kodiak Triple-Stack features additional logs and the Triple-Stack burner system, a 3rd burner added to the rear of the Double-Stack burner, for increased height, more mass, and greater depth of flame that will easily fill the largest fireplaces. Triple-Stack kits are offered in both styles of Kodiak series logs.

- More mass with either Kodiak Log Style
- 3rd Burner for larger deeper flames
- Natural gas only

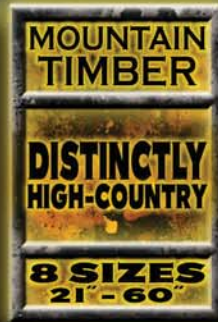

Triple-Stack Burner

Large Sets

VENTED GAS LOGS

Ember Supreme Burner

Mountain Timber's unique paint scheme and gnarled log shapes create a distinct likeness of high-country timber. Utilizing a new paint process and our time-tested craftsmanship, Mountain Timber has crisp, incredibly fine detail on its massive, rounded logs, and was created to fit our deeper Ember Supreme burner system, which offers taller flame patterns from an oversize single burner design. 2004 Vesta Award Finalist.

- Large, Rounded logs
- Ember Supreme Burner System
- Natural gas only

Summit Burner

Summit Oak features a huge stack of fresh cut oak logs and the Summit burner system, a deep, three-level pedestal grate with a combination pan and tube burner design, giving tremendous set depth and height with plenty of flame. The Summit burner system is the largest burner available in natural gas or liquid propane configurations.

- Majestic oak elegance
- Summit Burner System
- Natural gas and Liquid propane
