Why a Napoleon® Wood Burning Stove or Insert?

The answer is quite simple. No other hearth manufacturer in North America has perfected wood burning technology to the level that Napoleon® has... perfecting true craftsmanship to last a lifetime. Years of research, strict quality testing and advanced wood burning technology have surpassed critical standards, providing you with the cleanest, most efficient wood burning products. Napoleon® products are backed by the President’s Limited Lifetime Warranty, guaranteed to give you the solid performance you deserve.

Best Burn Times In The Industry... Napoleon® wood burning products offer state-of-the-art technology, unlike any others, completely utilizing the firebox chamber with a fully lined refractory system. The kiln-like firebox chamber allows for an amazing long day or overnight burn. The single lever combustion control allows for simple regulation of the burn rate.

No Power? No Problem!... We all feel vulnerable when there is a power outage, but with a Napoleon® wood burning fireplace, stove or insert, you can rely on comfort and heat when you need it most. Rest assured, you can enjoy a cozy, warm atmosphere when the power is out!

Warming Homes, Not The Environment... Napoleon® products are designed not only for outstanding heating efficiencies but Napoleon® also takes great pride in their commitment to provide environmentally friendly wood burning products. Napoleon’s wood burning technology exceeds EPA (Environmental Protection Agency) standards burning very clean with low emissions, helping to make a difference in keeping our environment safe.
1600C - Cast Iron Stove
Heating up to 1,500 sq. ft.

Fine, solid European cast iron design and Napoleon’s advanced wood burning technology transform small amounts of wood into large amounts of cozy heat, easily sustaining overnight burns. The EPA certified 1600C is available in porcelain enamel Majolica brown or painted metallic black finishes. The 1600C features elegantly arched Early American double doors that open fully, almost flush to the sides with concealed hinges and is convertible from top to rear vent for easy loading and installation flexibility. A beautiful investment for any room!

1600C
Up to 52,000 BTU’s
27”w x 28”h x 24”d
EPA Certified

1450 - Independence™ Wood Stove
Heating up to 2,000 sq. ft.

Napoleon® is proud to offer the world renowned quality of their clean burning wood technology at an economical price that’s easy on your budget. The 1450 Independence™ EPA wood burning stove provides the best value for your money - the same clean burning and efficient Napoleon® EPA technology, reliability and performance but in a “dressed down” version, yet includes pedestal base and metallic black cast iron door ready for installation! The non-catalytic high tech design eliminates the need for a delicate ceramic catalytic combustor, which can deteriorate over time. Take control of your independence from the utility companies and save money heating your home!

Help Protect The Environment With A Napoleon® Wood Burning Stove or Insert

Heating your home with a Napoleon® high efficiency, EPA (Environmental Protection Agency) approved fireplace, stove or insert releases no more carbon dioxide than a dying tree would lying on the forest floor. In fact, when the entire carbon cycle is considered, a Napoleon® EPA approved fireplace heats your home more efficiently and with less impact on the environment than any other heating fuel option.

Dual Vortex™ Action

To achieve an extraordinary clean burn without a catalytic combustor, horizontal jets of super heated secondary air are mixed with the fire’s smoke to burn off released smoke particles. You can actually watch the spirals of secondary flames just below the top during most of the burn.

Vortex™ Baffle - Lifetime Warranty*

Manufactured from high density material, Napoleon’s exclusive Vortex™ baffles provide an unprecedented level of durability while ensuring complete combustion resulting in a clean burning, environmentally friendly wood burning stove.

Secondary Air Tube - Kiln Construction

Napoleon’s secondary air tube is insulated with ceramic fibre and protected with a stainless steel cover plate, ensuring complete combustion. This fully lined refractory firebox acts as a kiln, concentrating the maximum amount of heat to efficiently heat your home.

WHISPER QUIET® Blower System

The extreme heat resistant "H" class bearings featured in Napoleon’s superior heat circulating blower, creates a lasting “whole home” comfort with adjustable high & low speeds.

*See dealer for details
Napoleon’s EPA Technology
Outperforms your expectations

1. Economical 6’ flue on even the largest models, assures you of efficiency and cost saving installations
2. Primary “bottom air feed” assists in cold start ups and to revive a small, dying fire
3. Secondary air tube insulated for complete combustion
4. Wrap around side shields add a delicate balance of elegance and functional practicality helping to disperse heat evenly and reduce clearances to combustibles
5. Large viewing area through an elegantly arched cast iron door
6. High heat ceramic glass provides a safe, unobstructed view of the fire
7. Effective airwash in combination with high temperatures keeps the viewing glass clean
8. Fully refractory lined firebox, similar to a kiln maintains the interior temperatures necessary to achieve low emissions
9. Ash dump with self-closing door is readily accessible (pedestal & cast iron models)
10. Large “king size” functional ash pan (600 cubic inch capacity) with two carrying handles lets you conveniently dispose of ashes (standard with pedestal and optional for leg models)
11. Folding ash pan lid allows for clean, no-mess ash removal (pedestal models)
12. Cool room air is circulated around the firebox, heated and returned to the room
13. The single lever burn control regulates primary and secondary air establishing a perfect mix and a clean burn

Napoleon’s EPA Wood Burning Technology... more heat with less fuel. Emissions as low as 2.8 grams per hour and 69.8% overall maximum heating efficiency.
Door Options

- Webbed Arched
  - Painted Metallic Black Finish
  - 24 Karat Gold Plated Finish
  - Satin Chrome Plated Finish

- Arched

- Painted Metallic Black Finish
- Porcelain Enamel Majolica Brown Finish
- Porcelain Black Finish

Options, Features & Accessories

- Heat Circulating Blower
- Ash Drawer Kit Option
- Napoleon’s porcelain enamel cast iron surround kits are available for the 1101 and 1402 inserts. Create a distinct elegance with either of the two colours.

- Napoleon’s porcelain enamel cast iron surround kits are available for the 1101 and 1402 inserts. Create a distinct elegance with either of the two colours.

- Porcelain Enamel Majolica Brown Finish
- COOKMATE™
  - The unique grid pattern moulded into the cast aluminum captures and retains the maximum amount of heat and transfers it directly to your frying pan or pot. The COOKMATE simply replaces your existing trivet.

- Legs available in traditional painted black steel or elegant cast iron in 24 Karat gold plated, satin chrome plated or painted metallic black finishes.

- Outside Air Kit Option
  - Wood burning appliances need air to burn and often compete with other appliances in the home. The outside air kit helps balance indoor air pressure by ensuring sufficient combustion air is fed directly to the wood burning stove.

- Napoleon Insignia
  - Beautiful Napoleon insignia ensures Napoleon quality is cast into every stove. (1600C only)

- Napoleon Insignia

*Painted metallic black finish comes standard  **Painted metallic black and satin chrome plated finishes only  ***Satin chrome plated finish only
If the stove is to be installed on a combustible floor, it must be placed on an approved non-combustible hearth pad, that extends 8 inches (200mm) beyond the stove sides and back, and 18 inches (455mm) to the front. Clearances can be reduced with shielding acceptable to local authorities. Reduced installation must comply with NFPA211 or CAN/CSA-B365.

* EPA (Environmental Protection Agency) rated BTU/h with softwood test fuel (for emissions only) - no refueling.
* Wolf Steel Ltd. own test results showing realistic BTU’s using hardwood logs with regular refueling. Heat output will differ on chimney draft as well as type, moisture content and size of wood.
** Figures may vary with individual conditions such as floor plan layout, insulation value/heat loss of the house, geographical location and firewood used.

If the stove is to be installed on a combustible floor, it must be placed on an approved non-combustible hearth pad, that extends 8" (200mm) beyond the stove sides and back, and 18" (455mm) to the front. Clearances can be reduced with shielding acceptable to local authorities. Reduced installation must comply with NFPA211 or CAN/CSA-B365. Clearances are unable to be reduced for the 1150 by using double wall pipe.

If the stove is to be installed on a combustible floor, it must be placed on an approved non-combustible hearth pad, that extends 8" (200mm) beyond the stove sides and back, and 18" (455mm) to the front. Clearances can be reduced with shielding acceptable to local authorities. Reduced installation must comply with NFPA211 or CAN/CSA-B365.
Napoleon® stoves are certified for emissions to EPA phase 2 1990 and DEQ 1988 Standards and safety tested by Warnock Hersey to North American Standards. CSA B366.2, ULC S627, ULC S628 and UL 1482. In addition to meeting current EPA requirements, all Napoleon® wood burning stoves and inserts with emissions at or below 4.5 grams per hour meet the proposed new EPA clean burning levels targeted for implementation in 2013. Consult your owner's manual for complete installation instructions and check all local and national building codes. All specifications and designs are subject to change without notice to allow for on-going product improvement. Images may not be exactly as shown. Actual enamel colours might be slightly different as shown in brochure. © Wolf Steel Ltd. Napoleon® is a registered trademark of Wolf Steel Ltd.
